

## DataStage Integration

This section will assume you have already created an instance of DataStage as indicated in the prerequisites section. You will also need a project and a data flow asset.

### 1. Test project and test flow

In case you already have a project and a DataStage flow you can use for testing, you can skip the next two steps. If not, they can be easily created in CloudPak for Data console by choosing the Sample Project and following the steps of the project creation interface.

Once the project is created, open the data flow asset and review that it contains a pipeline that can be run without errors.

## 2. API Key

Databand only needs an API key to access the pipelines created on DataStage projects. If you have no API key that you can use for this purpose, generate one:

The first screenshot shows the IBM Cloud IAM console. The left sidebar contains the IAM menu with options: Manage identities, Users, Trusted profiles, Service IDs, API keys, and Identity providers. The main area is titled 'Manage access and users' and shows a 'Users' section with a large purple arc and a 'Total users' count of 1. A red arrow points to the 'API keys' option in the sidebar, and another red arrow points to the 'Users' section header with the text 'display the IAM menu' and 'click on API keys'.

The second screenshot shows the 'API keys' page. The left sidebar is the same as the first screenshot. The main area is titled 'API keys' and contains a description of API keys and a 'View:' dropdown menu set to 'My IBM Cloud API keys'. A red arrow points to the 'Create' button with the text 'click here'.

Status	Name	Description	Date Created
		Required API key for IBM Cloud Kubernetes Service	

Create IBM Cloud API key ×

Name

databand-workshop ← type a name

Description

click here

Cancel Create

API key successfully created ×

Copy the API key or click download to save it. You won't be able to see this API key again, so you can't retrieve it later. The API key is no longer displayed after 280 seconds.

API key

Copy 📄 Download ⬇️

you can keep a copy in your computer

### 3. Databand configuration

Now, you must enter that key in the Databand configuration. Open the Databand console:

**Databand**  
an IBM Company  
1.0.19.7

Dashboard  
Pipelines  
Runs  
Alerts  
Datasets  
**Integrations**  
Settings  
Docs

**Integrations** + Add Integration

Search 🔍 Type of integration All Show All

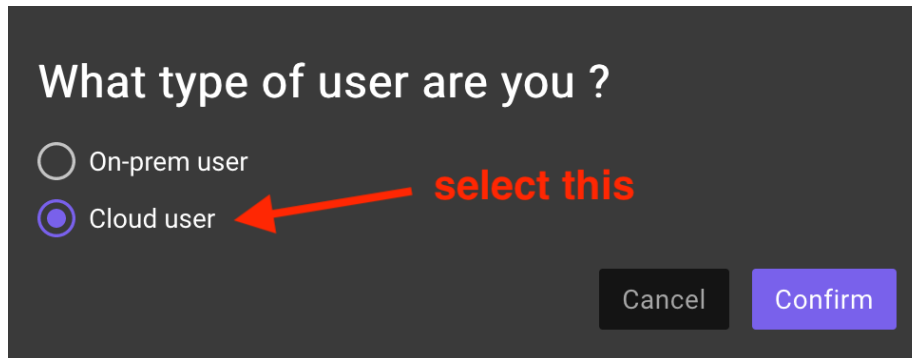

1 Integration

Control	Integration Name	Status	Last Synced & Monitor Updated	Additional Data Details	Actions
	Airflow <span>🔗</span>	✓ Running	Synced: Today at 09:37:32 AM Updated: Today at 09:52:14 AM	Monitor version: 1.0.12.3 v2 Export version: 1.0.12.3 Airflow version: 2.5.1	<span>Edit</span> <span>⋮</span>

select integrations click here

Records per page: 25 1-1 of 1

Select DataStage and, in the next prompt, select cloud user

What type of user are you ?

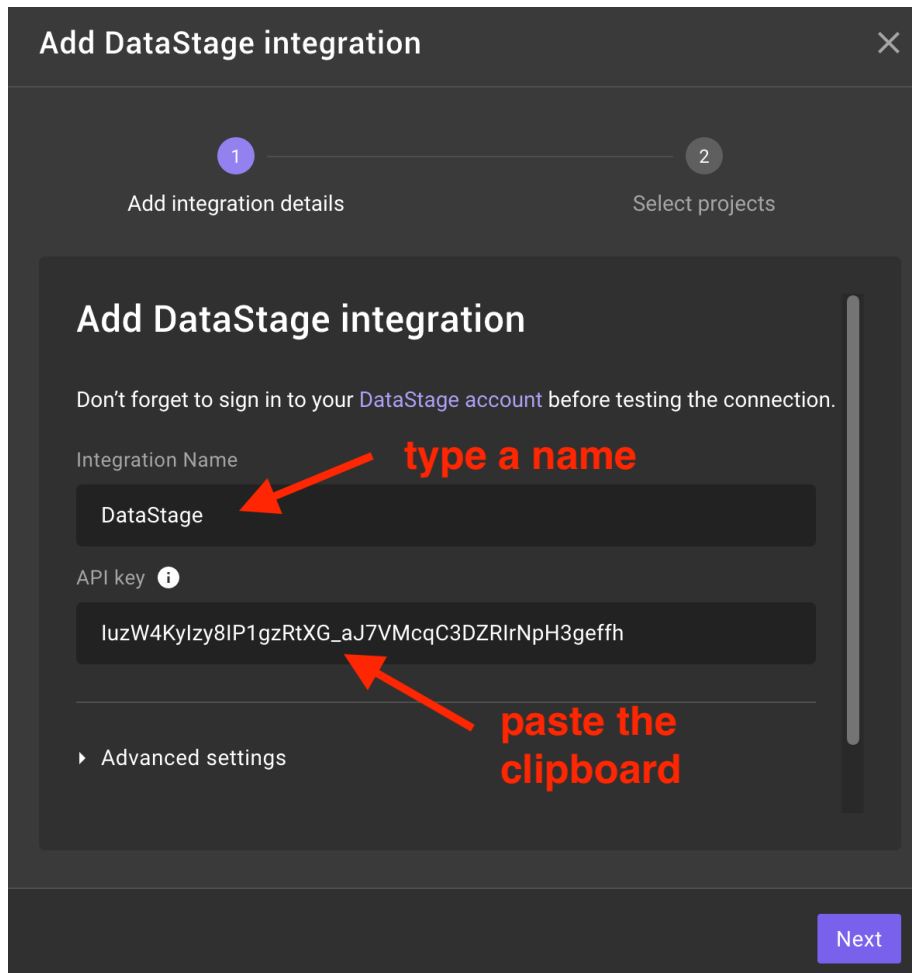

☐ On-prem user

☒ Cloud user

Cancel Confirm

**select this**

Now, you can paste the API key

Add DataStage integration

1 Add integration details 2 Select projects

Add DataStage integration

Don't forget to sign in to your [DataStage account](#) before testing the connection.

Integration Name

Advanced settings

Next

**type a name**

**paste the clipboard**

Then, you will be asked to select the project(s) you want to track:

The screenshot shows a dark-themed dialog box titled "Add DataStage integration" with a close button (X) in the top right corner. At the top, there is a progress bar with two steps: "Add integration details" (marked with a green checkmark) and "Select projects" (marked with a purple circle containing the number 2). Below the progress bar, the section is titled "Select DataStage projects". It indicates "1 project selected" and includes a search bar labeled "Search project name". A table lists three projects:

	Project	Creator	Source	
<input checked="" type="checkbox"/>	AngelProject	angelito@de.ibm.com	DataStage Account: 0ced05a...	
<input type="checkbox"/>	AngelProjectImport	angelito@de.ibm.com	DataStage Account: 0ced05a...	
<input type="checkbox"/>	Movie Recommender MVP Bl...	georgios.regkas@ibm.com	DataStage Account: 193af92...	

A "Save" button is located at the bottom right of the dialog box.

From this moment, all runs of the DataStage jobs included in this project will be captured by Databand.

The screenshot shows the Databand "Integrations" page. The left sidebar contains navigation links: Dashboard, Pipelines, Runs, Alerts, Datasets, and Integrations (highlighted). The main content area is titled "Integrations" and includes a search bar, filters for "Type of integration" and "Show", and an "Add Integration" button. Below, a table lists two integrations:

Control	Integration Name	Status	Last Synced & Monitor Updated	Additional Data Details	Actions
	AngelDS		Synced: Today at 06:44:55 PM Updated: Today at 06:44:55 PM		
	Airflow	Running	Synced: Today at 06:33:17 PM Updated: Today at 06:44:57 PM	Monitor version: 1.0.12.3 v2 Export version: 1.0.12.3 Airflow version: 2.5.1
